## TIPS Entry

### Technology Integrating Problem Solving

#### Purpose:

---

The TIPS program is an immersion entry program for students whose families want them to continue their classroom learning through technology immersion. The year seven curriculum will be taught with an explicit focus on problem solving, thinking and reasoning and working collaboratively, using the IPAD as a tool for enriching and extending curriculum learning.

#### Selection and Entry:

---

- Expression of Interest during enrolment
- Semester one Year 6 report card including effort and behaviour results at B or above
- Academic and Technology Contract Agreement
- Confirmation of enrolment by week one of term four , the year before entry
- IPAD – students will be required to bring an IPAD to school as a part of the BYOx program

#### What are we looking for?

---

- Students who are highly motivated and can demonstrate control over the use of an IPAD in a high school curriculum setting.
- Students who desire to be challenged and extended
- Students who will apply a growth mindset to their learning
- Students who want to engage in a wide variety of higher order thinking and advance problem solving learning opportunities

#### Program Benefits:

---

- Continued and extended learning through technology
- Students will develop thinking, reasoning and collaboration skills and apply them in and beyond the classroom

#### Program Opportunities:

---

- To continue to develop collaborative technology skills in an academic challenging environment
- Collaboration with peers through problem solving led by teachers who embrace and extend the technology experience
